Education

University of Washington – Seattle, WA

Expected: March 2026

Bachelor of Science in Computer Science | Minor in Mathematics

In-Major GPA: 3.7

Cummulative GPA: 3.38

Relevant Courses: Data Structures, Algorithms, Database Systems Design, Software Development, Computer Operating Systems, Cryptography

Highline College – Des Moines, WA

Associate of Arts

Work Experience

Database Development Intern | Muslimah Against Abuse Center – Seattle, WA

- Created SQL queries and scripts for participant record management, data validation, and report generation
- Extended existing database system to support event participant tracking and management

Technical Skills

Programming Languages: Java, Rust, C, Go, Python | **Databases:** SQL, SQLite, MySQL | **Frameworks:** Bevy Game Engine | **Concepts:** Data Structures, Algorithms, Database Design, ECS Design Pattern

Projects

Collaborative Dungeon Adventure Game | Team of 3 | *GitHub:* github.com/elijahimmer/a-hex-befalls-the-hexagons

Developed a roguelike dungeon crawler using Rust's Entity Component System architecture with Bevy game engine, emphasizing data-oriented design and composition over inheritance.

- **ECS Architecture:** Implemented modular systems for player movement, combat mechanics, and dungeon generation using component composition
- **Database Migration System:** Designed versioned SQLite schema with automated migrations, transaction-safe operations, and rollback capabilities
- **Error Handling & Testing:** Implemented comprehensive logging and unit tests for debugging and validation
- **Team Collaboration:** Coordinated development using version control and modular practices, delivering complete game within timeline

Technologies: Rust, Bevy Game Engine, SQLite, ECS, Data-Oriented Design, Database Migrations
